

Team 31 Meeting

Wednesday 10/26/22

Agenda

1. Kanban Board Create Backlog
2. Create Starting Pitch Slides

Just a reminder we have 2 meetings every week!

Wednesday 8:00 PM: Complete Canvas Assignments & Sprint Meetings

Saturday 10:30 AM: Meeting with TA to discuss progress

Work on Kanban board backlog

- Everyone create at least 1 feature/story on GitHub projects.

Create Starting Pitch Slides (Miro)

The pitch document should contain the topics of risks and rabbit holes as well as a visual representation of what you are doing in the form of system diagrams and wireframes. However, our pitch should also have a statement of purpose as well as a section on user personas. The pitch may take the form of a slide deck (PDF) of no more than 16 slides or a document (PDF file) of no more than 8 pages. We would prefer to see these documents in markdown form for easy modification, but we will allow a final PDF asset as well. Full page diagrams for specs will not count towards your page or slide totals. The limitation is just to keep you focused and to not over specify your project, as things will likely change as you go.
